

High quality flours Oro Fagioli are the result of more than 50 years experience in milling, where the values of the handmade tradition are enriched with the most modern and controlled production techniques.

In the production plant of Magione, Molini Fagioli Mills are equipped with a new technical centre enriched with a sperimental laboratory for bakers where a professional staff is always on the customers' side in order to:

- Guarantee the best flours' qualities
- Develop and test new products
- Assist their customers

# ORO FAGIOLI

Pasta fresca range

## ØØ PASTA FRESCA

### Recommended main uses

Specifically developed for the production of fresh pasta, in particular with the addition of eggs. Flour with low content of ashes. The pasta doesn't become grey and doesn't overcook easily.

### Processing methods

Ideal for the production of filled pasta (ravioli, tortellini, etc...)

### Chemical-physical properties

Moisture: max 15,5%  
Proteins: min 11,5%  
Ashes: tipo 00 max 0,36  
Wet Gluten: min 29%

### Rheological Properties

The very low ashes content preserves the light colour of pasta.

**Package**  
25Kgs pack

## SEMOLINA OF DURUM WHEAT

### Recommended main uses

Made from highly selected wheat, offering excellent stretch, absorption and hold. Very rough with a golden colour, it is ideal for producing drawn pasta, fresh pasta, bread, focaccia and pizza.

### Processing methods

Ideal for the production of long pasta (fettuccine, tagliatelle, etc...)

### Chemical-physical properties

Moisture: 15.5% max.  
Ashes: 0.80 max.  
Nitrogenated substances: 12.5% min.  
Dry gluten: 11% min.  
Gluten starch: 29.2% min.

### Rheological Properties

Brabender Farinograph  
Min. absorption 53.5%  
Min. stability 14'
